Dear Hiring Team,

I hope this letter finds you well. My name is Pragati Palanwar, and I'm thrilled to find opportunity in the Software world. I came across the opening on job boards, and after learning more about this opportunity and its exciting projects, I knew I had to throw my hat in the ring.

Let me tell you a bit about myself. I recently completed my Master's degree in Computer Applications (MCA), where I delved deep into the world of software development. During my studies, I became skilled with C, Java, Python, SQL, and Software development cycles. They're like the tools in my belt that I'm always eager to wield.

Now, about my experience – for the past six months, I've had the pleasure of putting my skills into practice. I worked on a project, named as "Polarize Edu Tech App". In this, I am able to developed robust APIs to enhance user experiences, Managed PostgreSQL databases, optimizing schema design for application needs, Implementing roles and groups mechanism to handle permissions effectively, enhancing security and access control within the software and let me tell you, seeing everything come together was incredibly rewarding.

I believe my blend of technical skills, coupled with my eagerness to learn and grow, make me a strong fit for the software developer position. I'm excited about the opportunity to contribute to company success and be part of a team that's making a real impact. I can see myself thriving in such an environment. I'm eager to bring my passion for technology and my knack for problem-solving to your team.

Thank you for considering my application. I'm looking forward to the possibility of discussing how I can contribute to company further. Please feel free to reach out to me at 7559459366 or palanwarpragati@gmail.com to schedule a chat.

Warm regards,

Pragati Palanwar
